

INTERNATIONAL FINANCE

Robert J. Trulaske, Sr.
College of Business
University of Missouri

Professor Dr. Dan French

Objective

The main objective of this course is to learn how to be an effective global financial manager. The main emphasis is on gaining a solid understanding of the international monetary system and using this knowledge to effectively manage in a multinational setting.

Materials

Readings are available for free download from the Internet. Students can also purchase chapters of *International Financial Management, 5e*, by Eun and Resnick. Class slides and examples will be distributed in class. You will need a basic 4-function calculator for all class meetings, quizzes, and exams. A more detailed list of readings and assignments will be distributed at the beginning of the term.

Evaluation

Grades will be based on your performance on two exams, several quizzes and papers/presentations, and your degree of professionalism/participation. Standard grading scales will apply.
